

Combiflex

CF 10 The classic system

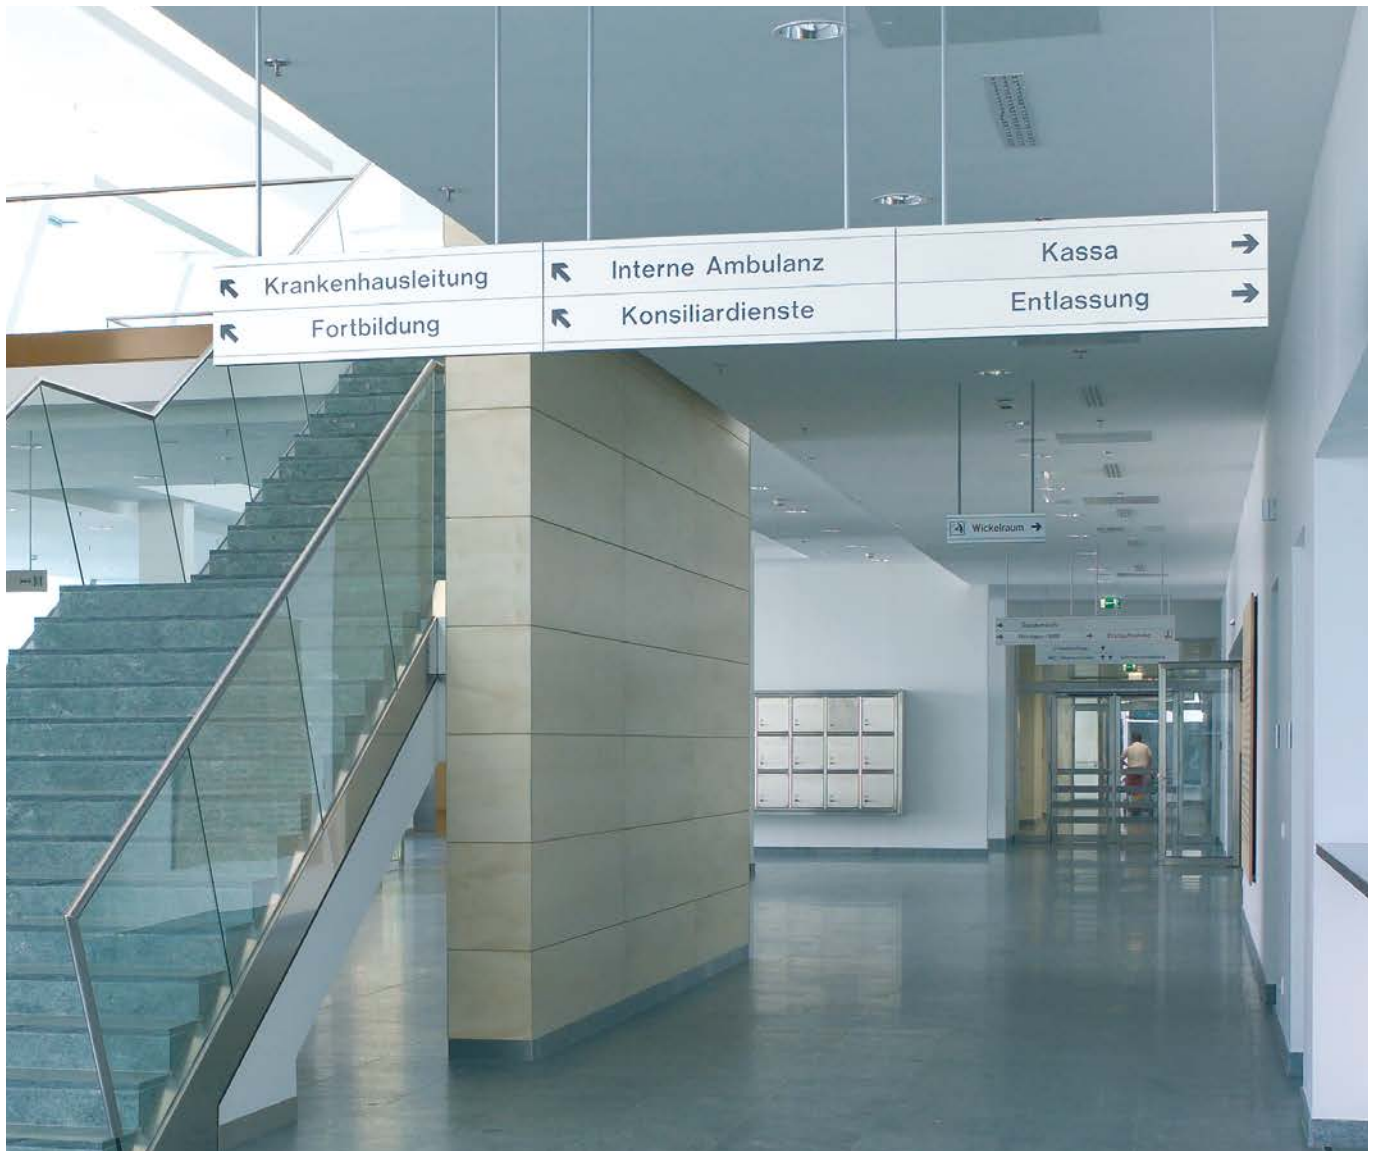

Combiflex CF 10

Directions and information

for every situation!

Combiflex is an extremely versatile system that can be used to display all types of information.

Of modular construction, it meets the requirements of planners and designers and allows information to be conveyed in many different ways.

The extensive choice of colour combinations for panels, edge trims and print combined with various design options allows the system to be incorporated into any type of interior scheme.

Displayed information is easily assimilated and provides clear guidance to customers, visitors and staff.

Functional and attractive –

from doors to corporate information

Regardless of shape, colour or size, Combiflex signs share the same concept. All types of signs can be accommodated within each of the different styles of edge trim, allowing corporate identity and common design themes to be maintained.

Simple to use, attractive in design, versatile and easily installed, Combiflex signs convey information effectively and lend themselves to every type of environment.

Door sign

Choose between seven different edge trims!

Standard

Quadrant

Segment

Door signs and pictograms can be produced as wall signs or flag signs.

Directional signs are only available as wall signs or ceiling mounted.

Ceiling mounted

Directional sign

General information sign

OSTARRICHI-KULTURHOF	
Obergeschoß	Gemeindeamt
	Bürgermeister
	Amtsleiter
	Bauamt
	Besprechungszimmer
	Buchhaltung
	Meldeamt
	Sekretariat
	Sitzungssaal
	Standesamt
	Traugungssaal
Erdgeschoß	Festsaal
Untergeschoß	Ausstellung
	Ausstellungsleitung
	Bürgerservicestelle

Contour

Triangle

Individual Wood

Individual Aluminium

With horizontal edge profile and without horizontal edge profile

All Combiflex signs are fitted with upper and lower horizontal edge profiles. These ensure that the connecting elements are hidden and that the sign is a fully integrated unit.

If horizontal edge profiles are not used, parts of the connecting elements can be clearly seen.

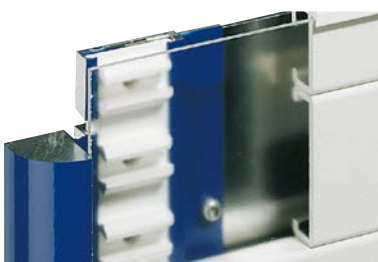

Clip-in components

Information carrying sections and horizontal edge profiles are securely held by clip support strips.

Snap-in function

This feature is particularly useful when an information carrying section needs to be changed quickly. (For panel widths up to 400 mm).

Acrylic cover panel

Where edge trims are "Quadrant", "Triangle", "Individual Wood" or "Individual Aluminium", transparent acrylic 1.5 mm thick is used to cover the sign.

Construction for Combiflex CF 10!

Separators

OSTARRICHI-KULTURHOF	
Obergeschoß	Gemeindeamt
	Bürgermeister
	Amtsleiter
	Bauamt
	Besprechungszimmer
	Buchhaltung
	Meldeamt
	Sekretariat
	Sitzungssaal
	Standesamt
Trauungssaal	
Erdgeschoß	Festsaal
Untergeschoß	Ausstellung
	Ausstellungsleitung
	Bürgerservicestelle

Separators serve to structure areas of information. They form vertical divisions in larger signs such as those giving general information or details of the various rooms on individual floors of a building.

Framed signs

Where signs are fully framed, the frame itself is made up in sections to facilitate any subsequent change of information panels.

In specifying framed signs, a choice can be made between a number of individual information carrying profiles and a complete one-piece aluminium sheet.

Signs can be single or double-sided and can optionally be fitted with clear acrylic cover panels.

Flexible and compatible!

Sign-writing methods for Combiflex CF 10

Einschubstreifen

Insert made of paper or transparent materials, with a transparent cover panel, height 20, 40, 60, 80 mm.

Einschubstreifen

Insert made of Travply, engraved, height 20, 40, 60, 80 mm.

Klebetext

Adhesive lettering, height 20, 40, 60, 80, 100, 120, 160 mm.

Siebdruck

Silk screen print, height 20, 40, 60, 80, 100, 120, 160 mm.

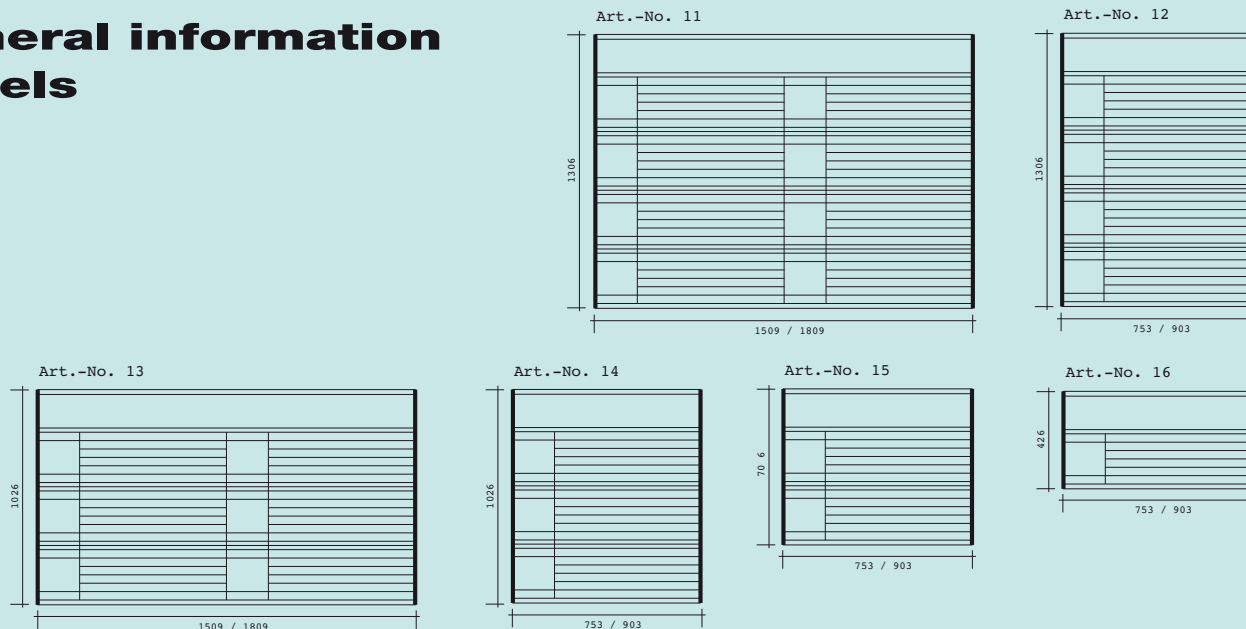

Gravur

Engraved, height 20, 40, 60, 80, 100, 120, 160 mm.

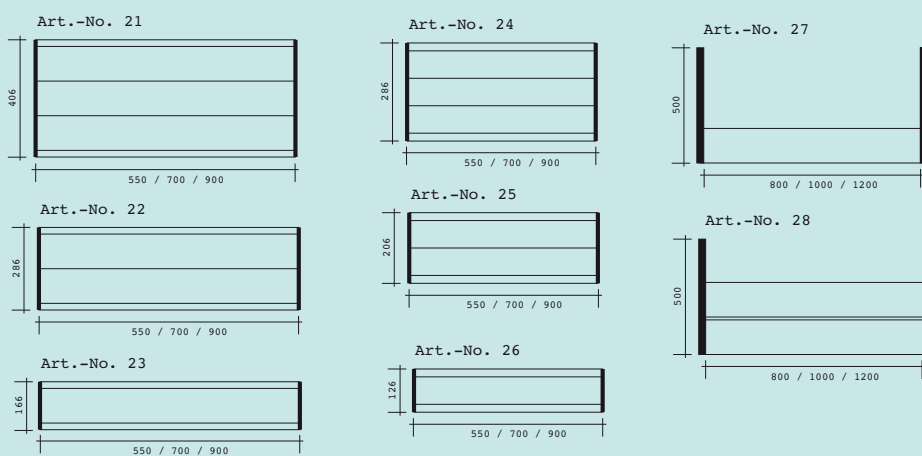

Standard sizes

To simplify ordering, an extensive range of standard size signs – based on the most frequently requested sizes – is available. Our manufacturing facilities naturally enable us to supply signs in sizes other than the standard ones on request.

Add-ons

Versatile and expandable

Flag fixed signs may also have information on both sides and are available in a range of sizes.

A wide range of standard components means that many different sign sizes can be produced. Signs can be suspended from chains or profiles. Information can be displayed on several lines and on both sides of the sign.

Particularly slim door signs, only 5 mm in depth, for variable labelling with paper inserts (sizes DIN A4 and DIN A5 available).

Single letters

Laser-cut letters made from aluminium of a thickness of 3 mm, for projected wall-mounting.
